SKILLS

Frontend: Vue, Svelte, React, Vanilla JS, Jest, Typescript, SASS

Backend: Node.js, Python, Express, Nest, Django, MongoDB, MySQL, PostgreSQL

Cloud: AWS(cloudFront, S3, EC2, amplify, dynamoDB, API Gateway, CodePipeline, CodeBuild lambdas)

EXPERIENCE

Orkestra – **Lead Frontend Web Developer** (March 2022- Present)

- Upgraded the frontend from Vue2 to Vue3, migrating from webpack to vite, from vue2(optionsAPI) to vue3(compositionAPI), replacing vuex by pinia, adding Typescript, Vitest and vueQuery.
- Improved performance by 40% by managing requests with vueQuery, restructuring global state management and communication between components.
- Accelerated the development process by implementing unit tests with TDD methodology and implementing CI/CD with Jenkins.
- Created new services using Laravel, Redis, Nest, TypeScript Docker and Kubernetes.
- Defined deadlines and tasks for the team, reviewed PR's and mentored other engineers.
- Creation from scratch of PWA with Quasar.

Grupo Santillana México – **Software Developer** (August 2020 - Oct 2021)

- Maintenance and development of educational games with Vanilla JS, React, Laravel, Quasar, Express and PostgreSQL.
- Team lead in charge of converting a flash app to a modern web app using VueJS and Firebase.
- Coaching and mentoring other engineer, collaborate with product managers, designers, stakeholders and anyone else to help choose the best technologies

University of London – **Associate College Professor** (March 2019 - November 2022)

- I teach frontend, backend, UX/UI, testing, and deployment of web applications using technologies such as HTML, CSS, JS, PHP, MySQL, Adobe XD, Drupal, Wordpress, figma, jest, and heroku.
- I taught pentesting and some topics about cybersecurity using Kali tools.

Linio México – **HTML Analyst** (October 2018 - November 2019)

- Developing web components and landing pages with Vanilla JS and Bootstrap.
- Automate content creation processes with Vanilla Js and the intern platform.
- Redesign and prototyping using Adobe Suite.

TBS IT – **Web developer** (June 2018 - April 2019)

- Development of templates and plugins for wordpress, joomla and drupal using PHP, Laravel, HTML, CSS and JS
- UI Design using Adobe Suite.

Freelancer – **Full stack Developer** (October 2017- November 2021)

- Development of web pages and templates for wordpress, magento and drupal.
- Creating web applications using Vue, React, Svelte, Laravel, NodeJs and Django.

EDUCATION

Computer Engineering – FES Aragón UNAM

TAKE ACTION

Nogara DevCode – **Founder** (January 2018- Present)

Programming community focused on making digital technologies known to young people in Latin America through workshops, webinars, meetups, courses, etc.

Hackatones – **Mentor** (October 2021- Present)

Mentoring on programming, ux/ui design, definition of mvp and speech.

Talent Hackaton 2022, Hackaton BBVA 2021-2022, Datatón 2021-2022, Hacking breaches 2022.

TALKS

Google Developer Students Club ESCOM IPN – IPN ESCOM (November 2022)

[Lecture: "How do I know in which area to specialize?"](#)

Week of sciences and humanities 2022 – High school Andres Quintana Roo (October 2022)

[Lecture: "What does a software developer do?"](#)

[Lecture: "How to make a video game"](#)

Google Developer Group Orizaba – TecNM Campus Orizaba (October 2022)

[Lecture: "What now that I'm an engineer?"](#)

Forotok 2022 – UNAM FES Aragón (August 2022)

[Lecture: "How to learn technology in a minute?"](#)

Talent Land 2021 – (July 2021)

[Lecture: "Unboxing the world of work"](#)

[Lecture: "Areas of software development and how to choose one"](#)
